OUR PROMISE

COMMITTED TO HELP YOU GROW.

Axis Seed™ is the fastest-growing independent seed company in the U.S. because of our unique business model. Through our locally owned Independent Regional Companies (IRCs), you have access to the latest traits and technologies. Your IRC won't waste your time with unnecessary buzzwords or orders from corporate. What you can expect is a dedicated partnership where you receive personalized, premium products that are designed to perform in your specific soil—because helping you succeed is the only way we do.

Working with Axis is unlike your relationship with any other company, and it won't take long to see why.

Hello, my name is David Brawner. My wife Christina and I established 21st Century Seed, Inc. in 2001. We are the owners of the Missouri division of Axis Seed for corn and soybeans. We are also a full service seed company carrying wheat, forages, and grasses.

I have been in the seed business for over 30 years. Starting in 1985, I built seed territories for the corporate world in 17 states. The monumental difference between Axis Seed and international corporations is that we are paid and influenced by our customers, and 100% of our decisions are based on what works for our customers. Our customers have the advantage of access to the best genetics available, and the expertise of a local independent company to place the products in the right fields. We control the genetic selections, testing of new lines, production standards, and especially quality protocols of germinations for vigor. To us, quality is paramount and is what separates us from the industry confusion.

Our staff grew up in Missouri, farmed in Missouri, and were educated and trained in Missouri soils and conditions. Concentrating on a specific area makes us your Missouri seed expert.

National Brand • Local Ownership • Unparalleled Advantages

Boonville, Missouri - Exit 106 off I-70 on the S.W. corner

CUSTOMER TESTIMONIAL

When people ask why I buy Axis seed, I tell them that customer service is very important to me. I've worked with several other seed companies and Axis is by far the best. On farm yield trials, they were in the top of their class. They make the farmer feel important, I'm not just another account. It makes you want to do business with someone who treats you with respect.

Tom Bonderer - Winston, MO

Your soil is unique. **Get more from it with select hybrids.**

Corn Traits

RR		Roundup Ready® Corn 2
VT2PRIB		VT Double PRO® RIB Complete® Corn Blend
VT3PRIB		Genuity® VT Triple PRO® RIB Complete® Corn Blend
DGVT2PRIB		DroughtGard® Hybrids with VT Double PRO® RIB Complete® Corn Blend
GTCBLL		Agrisure® GT/CB/LL
3000GT		Agrisure® 3000GT
5122A		Agrisure Duracade® 5122A E-Z Refuge®

57A25

VT2PRIB

106-108 Day Maturity

- Dominant yield performance
- Scores high for late season stay green and intactness
- Consistent ear development with very deep kernels
- Widely adapted east to west in zone

58R28

VT2PRIB

107-109 Day Maturity

- Attractive late season plant integrity
- Moves south as an early hybrid
- Good tolerance to greensnap
- Maintains deep kernels across environments

60K23 VT2PRIB

109-111 Day Maturity

- Very strong yield potential
- Very good ability to move north to south for RM
- Wide adaptability for planting populations with good ear flex
- Very good yield response to irrigation

61T21 VT2PRIB

110-112 Day Maturity

- Consistent yield performance
- Medium stature with excellent stalks and roots
- Exhibits good late season intactness and appearance
- Very good southern movement

62D21 VT2PRIB

111-113 Day Maturity

- Excellent stress tolerance
- Stable across all environments
- Solid stalk and excellent root strength
- High test weight

62L25 3000GT

111-114 Day Maturity

- Outstanding yield performance with exceptional agronomics
- Outstanding roots and stalks
- Excellent test weight and grain quality
- Very good Goss' Wilt tolerance

Versions: 62L05 Conv

62M25 VT2PRIB

111-113 Day Maturity

- Very strong yield potential over a wide geography
- Consistent performance over a wide range of soil types
- Good southern movement for maturity
- Excellent root rating, good drought tolerance

63R22 VT2PRIB

112-114 Day Maturity

- Widely adapted east to west with good southern movement
- Medium stature, impressive ear length and flex
- Produces deep kernels, good husk coverage
- Exceptional disease package including Goss' Wilt and GLS tolerance

Versions: 63R12 RR

64G38 3000GT

113-115 Day Maturity

- High yielding, full season hybrid with unique genetics
- Excellent emergence and early vigor for early planting and no-till
- Excellent plant health
- Consistent performance

64J29 GTCBLL

113-115 Day Maturity

- Outstanding plant health and stability in southern corn markets
- Very good leaf disease tolerance
- Very good late season stay green
- Very good stalk and roots

64K24 VT2PRIB 113-115 Day Maturity

- Outstanding yield potential
- Very good stalks and roots
- Stable performance under drought stress
- Avoid SU herbicide treatment

Versions: 64K04 Conv

64M04 CONV 113-115 Day Maturity

- Widely adapted hybrid
- Consistent ear size with very good test weight
- Very good drought tolerance
- Dual-purpose potential

64R50 VT2PRIB 113-115 Day Maturity

- High yield potential
- Nice fall intactness
- Excellent test weight
- Excellent grain quality

Versions: 64R05 Conv

65H25 VT2PRIB 114-116 Day Maturity

- High yield potential over a broad range of environments
- Very good stalks and drought tolerance
- Excellent grain quality
- Excellent test weight

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

As of this printing no dicamba herbicide product has been approved for commercial in-crop use with Roundup Ready 2 Xtend® soybeans. DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO Roundup Ready 2 Xtend® Soybeans in 2016 unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application. While no in-crop use of dicamba is currently approved, some dicamba products may be labeled for weed control prior to planting a crop and subject to minimum plant back restrictions. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON Roundup Ready 2 Xtend® Soybeans, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® Soybeans and follow all pesticide product labeling.

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product.

B.T. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

IMPORTANT IRM INFORMATION: Genuity® RIB Complete® corn blend products do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Always read and follow IRM requirements.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready 2 Xtend Soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your Monsanto dealer or refer to Monsanto's Technology Use Guide for recommended Roundup Ready® Xtend Crop System weed control programs.

Acceleron and Design®, DroughtGard®, Genuity Design®, Genuity Icons, Roundup®, Roundup Ready 2 Yield®, Roundup Ready®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, RIB Complete and Design®, RIB Complete®, SmartStax and Design®, SR Design™, VT Double PRO® and VT Triple PRO® are trademarks of Monsanto Technology LLC. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. All other trademarks are the property of their respective owners.

Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

SOYBEAN PIRACY STATEMENT Seeds containing the Genuity® Roundup Ready 2 Yield® or the Roundup Ready 2 Xtend® traits can only be used to plant a single commercial crop. It is unlawful to save and replant Genuity® Roundup Ready 2 Yield® or Roundup Ready 2 Xtend® soybeans. Additional information and limitations on the use of these products are provided in the Monsanto Technology Stewardship Agreement, the Monsanto Technology Use Guide, and 2016 Technology Use Guide Addendum to include Roundup Ready 2 Xtend® Soybeans. U.S. patents for Monsanto technologies can be found at the following webpage: <http://www.monsantototechnology.com>.

BENEFITS OF NEW SEED: High Value of New Brandseed Seed

Latest Technology

- Highest yielding soybean technology available
- Six soybean trait products anticipated to come from Monsanto in the next 2-7 years*
- Leading seed treatment options

Customer Service

- Dealer agronomic support before and after the sale
- Replant policy support
- Convenient packaging and delivery

Reliable Germination and Quality

- Rigorously tested for quality and meets US Federal Seed Act requirements
- Free of seed-borne diseases
- Properly stored and conditioned

*Pending regulatory approvals.

Respect the Rotation™ is an initiative to elevate the importance and grower adoption of herbicide diversity to prevent or manage weed resistance. Glyphosate weed resistance is a dominating threat throughout the United States that affects land values, rental agreements, conservation tillage and can greatly reduce yields. The use of Integrated Weed Management practices, such as use of residuals, preemergence herbicides and rotation of crops, traits and herbicides, is critical as no one method is likely to be completely successful.

LIBERTYLINK® PATENT STATEMENT: Seeds containing the LibertyLink® trait are protected under multiple U.S. patents and may be planted only to produce one (1) commercial crop, and only after signing a Bayer Grower Technology Agreement. It is illegal to save or catch seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.
