

SEED CATALOG 2017

OUR PROMISE

COMMITTED TO HELP YOU GROW.

Axis Seed™ is the fastest-growing independent seed company in the U.S. because of our unique business model. Through our locally owned Independent Regional Companies (IRCs), you have access to the latest traits and technologies. Your IRC won't waste your time with unnecessary buzzwords or orders from corporate. What you can expect is a dedicated partnership where you receive personalized, premium products that are designed to perform in your specific soil—because helping you succeed is the only way we do.

Working with Axis is unlike your relationship with any other company, and it won't take long to see why.

Grow Strong™

Products selected for your farms.

Products evaluated and chosen for their genetic strengths, adaptation and performance here in Western Iowa.

NEW!

49R23 98-100 98-100 Day Maturity

- › Good adaptability from east to west
- › Excellent stalk rating
- › Tall attractive plant with good health
- › Strong Goss' Wilt tolerance

51G55 100-102 100-102 Day Maturity

Also Available: 51G25VT2PRIB

- › Excellent top-end yield potential - strong agronomics
- › Widely adaptable across many soil types
- › Very good late season intactness
- › Excellent root rating - good drought tolerance

* Excellent choice for corn on corn acres.

NEW!

55M25 104-106 *104-106 Day Maturity*

- » Outstanding performance across corn belt, north to south
- » Strong response to irrigation - good Goss' Wilt tolerance
- » Excellent test weight
- » Very good S. Leaf Blight and Eye Spot tolerance

56Z50 105-107 *105-107 Day Maturity*

NEW!

Also Available: 56Z20VT2PRIB

- » Responds to high management for top-end yields
- » Very good test weight
- » Good east to west movement
- » Very good Goss' Wilt tolerance

** Excellent performance north of zone as a full-season product.*

57A25 106-108 *106-108 Day Maturity*

- » Dominant yield performance
- » Scores high for late season stay green and intactness
- » Consistent ear development - very deep kernels
- » Widely adapted east to west in zone

57H55 106-108 *106-108 Day Maturity*

Also Available: 57H25VT2PRIB

- » Excellent roots and very good stalks
- » Position on average to better soils
- » Very consistent ear within row
- » Good Goss' Wilt rating

58A55 107-109 *107-109 Day Maturity*

NEW!

Also Available: 58A28DGVT2PRIB

- » Excellent yield - good east to west adaptation
- » Medium stature - good stalks and excellent roots
- » Strong ratings for foliar diseases and Goss' Wilt
- » Positive responses to high management and high density

** Good choice for corn on corn acres.*

58R28 107-109 *107-109 Day Maturity*

- » Attractive late season plant integrity
- » Moves south as an early hybrid
- » Good tolerance to greensnap
- » Maintains deep kernels across environments

** Exceptional pollination under hot/dry conditions.*

60A82 109-111 *109-111 Day Maturity*

NEW!

Also Available: 59M29VT2PRIB

- » High yield potential
- » Impressive stalk and root strength - great fall intactness
- » Medium stature with girthy ears and deep kernels
- » Recommend high populations for optimum yield

** Early plant emergence is very good in Northwest Iowa.*

NEW!

60K23 109-111 *109-111 Day Maturity*

- » Very strong yield potential
- » Very good ability to move north to south for RM
- » Wide adaptability for planting populations - good ear flex
- » Very good yield response to irrigation

NEW!

60N56 109-111 *109-111 Day Maturity*

- » Outstanding disease tol. including Goss' Wilt
- » Fixed, girthy eared hybrid - excels at high plant pop.
- » Medium stature - impressive late season appeal
- » Consider CAC fields requiring strong disease tol.

60R50 109-111 *109-111 Day Maturity* *Also Available: 60R20VT2PRIB, 60R06*

- » Widely adaptable across many soil types
- » Large, girthy ear
- » Excellent greensnap tolerance
- » Excellent roots and very good stalks

* 60R50: Excellent choice for corn on corn.

62M55 111-113 *111-113 Day Maturity* *Also Available: 62M25VT2PRIB*

- » Very strong yield potential over a wide geography
- » Consistent performance over a wide range of soil types
- » Good southern movement for maturity
- » Very good early vigor with great drought tolerance

* 62M25: Carries ASR gene.

NEW!

62P55 111-113 *111-113 Day Maturity*

- » Responds best at higher populations
- » Attractive hybrid with excellent stalks and roots
- » Very good Goss' Wilt tolerance
- » Very good greensnap rating

SOYBEAN BRANDS

The truth is, there's no "average acre."
So why choose an average bean variety?

Soybean Traits

RR2X		Roundup Ready 2 Xtend® Soybeans
RR2Y		Genuity® Roundup Ready 2 Yield® Soybeans

NEW!

2117NRX RR2X 2.1 Relative Maturity

- » Moderate resistance to BSR
- » Very good standability
- » Excellent emergence and stress tolerance

NEW!

2317NRX RR2X 2.3 Relative Maturity

- » Tremendous plant style and standability
- » Excellent SWM field tolerance
- » Very good emergence and stress tolerance

2416NR RR2Y 2.4 Relative Maturity

- » Widely adapted soybean
- » Excellent yield potential
- » Very good emergence and standability

NEW!

2517NRXS RR2X 2.5 Relative Maturity

- » Moderate resistance to BSR
- » Attractive gray/tan variety
- » Very good eye appeal at harvest

NEW!

2615R RR2Y 2.6 Relative Maturity

- » Tough, rugged soybean with tremendous yield
- » Very IDC tolerance
- » Excellent SCN tolerance

2815NR RR2Y *2.8 Relative Maturity*

- » Offensive yield with tough, durable stress tolerance
- » Nice defensive package - BSR, SCN and PRR
- » Widely adapted to all soil types and fertility
- » Medium-tall plant with great width and branching

NEW!

2816NRX RR2X *2.8 Relative Maturity*

- » Excellent standability
- » Very good emergence and stress tolerance
- » Moderate resistance to BSR

2916NR RR2Y *2.9 Relative Maturity*

- » Very attractive soybean with nice width
- » Excellent yield potential across the board
- » Very good emergence and stress tolerance

NEW!

3026NRX RR2X *3.1 Relative Maturity*

- » Excellent upright intermediate branching plant type
- » Very good SDS, SWM and PRR tolerance
- » Phytophthora and Cyst Nematode resistant
- » Very reliable defensive soybean

One of the fastest growing seed companies in the industry: Why?

- › We downsize a geography into Independent Regional Seed Companies (IRCs) of AXIS SEED
- › Allow these IRCs to select genetics that have specific adaptation to a selling area, and not be forced to sell mediocre product
- › Adapt to new technologies and genetics quickly for the area
- › Access traits/genetics/treatments from a multitude of sources, allowing diversity and ability to deliver more options to Axis Growers
- › Provide more information on specific genetics and traits, and how/where they will perform in this local geography because of first hand experience and knowledge

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

As of this printing no dicamba herbicide product has been approved for commercial in-crop use with Roundup Ready 2 Xtend[®] soybeans. **DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO Roundup Ready 2 Xtend[®] Soybeans in 2016 unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application.** While no in-crop use of dicamba is currently approved, some dicamba products may be labeled for weed control prior to planting a crop and subject to minimum plant back restrictions. **IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON Roundup Ready 2 Xtend[®] Soybeans, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE.** Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend[®] Soybeans and follow all pesticide product labeling.

Monsanto Company is a member of Excellence Through Stewardship[®] (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Certain products have been approved for import into key export markets with functioning regulatory systems. Roundup Ready 2 Xtend soybeans have been approved for cultivation in the U.S. and Canada, and for import in Australia/New Zealand, Colombia, China, Japan, Korea, Mexico, Taiwan, and Vietnam. The single events in Roundup Ready 2 Xtend soybeans have been approved for import in the EU. As of February 2, 2016, E.U. stack approval for Roundup Ready 2 Xtend soybeans is in the final stage of approval and is expected but not guaranteed to be received in the near future. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotradestatus.com/> for any updated information on import country approvals. Excellence Through Stewardship[®] is a registered trademark of Biotechnology Industry Organization.

B.t. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

IMPORTANT IRM INFORMATION: Genuity[®] RIB Complete[®] corn blend products do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Always read and follow IRM requirements.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready 2 Xtend Soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your Monsanto dealer or refer to Monsanto's Technology Use Guide for recommended Roundup Ready[®] Xtend Crop System weed control programs.

Acceleron and Design[®], DroughtGard[®], Genuity Design[®], Genuity Icons, Roundup[®], Roundup Ready 2 Yield[®], Roundup Ready[®], Roundup Ready 2 Technology and Design[®], Roundup Ready 2 Xtend[®], RIB Complete and Design[®], RIB Complete[®], SmartStax and Design[®], SmartStax[®], SR Design[™], VT Double PRO[®] and VT Triple PRO[®] are trademarks of Monsanto Technology LLC. LibertyLink and the Water Droplet Design[®] is a registered trademark of Bayer. Herculex[®] is a registered trademark of Dow AgroSciences LLC. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

LIBERTY LINK © 2016 Bayer CropScience LP, 2 T.W. Alexander Drive, Research Triangle Park, NC 27709. Always read and follow label instructions. Bayer (reg'd), the Bayer Cross (reg'd), ILeVO[®], Liberty[®], LibertyLink[®], Poncho[®], VOTIVO[®], and the Water Droplet Design (reg'd) are trademarks of Bayer. Not all products are registered for use in all states. For additional product information call toll-free 1-866-992-2937 or visit our website at www.BayerCropScience.us.

Respect the Rotation[™] is an initiative to elevate the importance and grower adoption of herbicide diversity to prevent or manage weed resistance. Glyphosate weed resistance is a dominating threat throughout the United States that affects land values, rental agreements, conservation tillage and can greatly reduce yields. The use of Integrated Weed Management practices, such as use of residuals, preemergence herbicides and rotation of crops, traits and herbicides, is critical as no one method is likely to be completely successful.

LIBERTYLINK® PATENT STATEMENT

Seeds containing the LibertyLink® trait are protected under multiple U.S. patents and may be planted only to produce one (1) commercial crop, and only after signing a Bayer Grower Technology Agreement. It is illegal to save or catch seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.

SOYBEAN PIRACY STATEMENT

Seeds containing the Genuity® Roundup Ready 2 Yield® or the Roundup Ready 2 Xtend® traits can only be used to plant a single commercial crop. It is unlawful to save and replant Genuity® Roundup Ready 2 Yield® or Roundup Ready 2 Xtend® soybeans. Additional information and limitations on the use of these products are provided in the Monsanto Technology Stewardship Agreement, the Monsanto Technology Use Guide, and 2016 Technology Use Guide Addendum to include Roundup Ready 2 Xtend® Soybeans. U.S. patents for Monsanto technologies can be found at the following webpage: <http://www.monsantotechnology.com>.

BENEFITS OF NEW SEED: High Value of New Branded Seed

Latest Technology

- Highest yielding soybean technology available
- Six soybean trait products anticipated to come from Monsanto in the next 2-7 years*
- Leading seed treatment options

Customer Service

- Dealer agronomic support before and after the sale
- Replant policy support
- Convenient packaging and delivery

Reliable Germination and Quality

- Rigorously tested for quality and meets US Federal Seed Act requirements
- Free of seed-borne diseases
- Properly stored and conditioned

*Pending regulatory approvals.
