

SEED CATALOG 2017

The logo for axis seed features the word "axis" in a bold, white, sans-serif font with a small green leaf icon above the "i". Below "axis" is the word "seed" in a white, lowercase, serif font. A trademark symbol (TM) is located to the upper right of "axis".

OUR PROMISE

COMMITTED TO HELP YOU GROW.

Axis Seed™ is the fastest-growing independent seed company in the U.S. because of our unique business model. Through our locally owned Independent Regional Companies (IRCs), you have access to the latest traits and technologies. Your IRC won't waste your time with unnecessary buzzwords or orders from corporate. What you can expect is a dedicated partnership where you receive personalized, premium products that are designed to perform in your specific soil—because helping you succeed is the only way we do.

Working with Axis is unlike your relationship with any other company, and it won't take long to see why.

AXIS SEED SELECT SEEDS

It is our strong belief that a seed company cannot serve the needs of all growers in all locations from a single location. That's why we serve our customers through a network of Independent Regional Companies located throughout the Farm Belt. Your success hinges upon a hands-on seedsman matching the right genetics and traits for your specific growing conditions, and that's just what you'll get with your Axis Independent Regional Company.

When you work with a single major genetic and trait provider, you are limited to their current seed catalog choices. Often, seed best suited for your growing conditions might be discontinued in favor of seed that can get average results for more acres. This is why Axis likes to keep our genetic and trait options open, freeing your Independent Regional Company to prescribe the best seed for your acres.

ARE YOU GETTING THE MOST FROM **EVERY ACRE?**

You will with SeedSync.SM

We combine state-of-the-art technology, advanced soil analysis, and years of seed expertise to help you plant the right hybrids on the right acres.

Get more from your soil. Ask about SeedSync today.

GTA		Agrisure Artesian® GTA
3110		Agrisure Viptera® 3110

42M53 GENSSRIB 91-93 Day Maturity

NEW!

- Tremendous yield performance across years
- Widely adapted across varying environments
- Very good early vigor with good stress tolerance
- Exceptional consistent ear development

| F | AVG | G | VG | E |

Versions: 42M23VT2PRIB

42U14 3000GT 91-93 Day Maturity

- Fantastic yield potential
- Widely adapted across maturity zones and soil types
- Very good stalks and fast dry down
- Best adapted to corn-soybean rotation management practices

| F | AVG | G | VG | E |

* Based on four years field observations by Select Seeds.

45I97 VT3PRIB 94-96 Day Maturity

- Very good late season intactness and plant health
- Stable performance
- Early flowering hybrid
- Responds well to higher populations

| F | AVG | G | VG | E |

* Based on four years field observations by Select Seeds.

46K25 VT2PRIB 95-97 Day Maturity

- Excellent top-end yield
- Excellent roots with very good stalks
- Very good performance in low yielding environments
- Dual-purpose hybrid

| F | AVG | G | VG | E |

49A59 GENSSRIB 98-100 Day Maturity

- Very good performance on all soil types
- Consistent girthy ears
- Very good heat and drought tolerance
- Very good Goss' Wilt tolerance

Versions: 49A29VT2PRIB

51L93 3011A 100-102 Day Maturity

- Broadly adapted Agrisure Artesian® Hybrid
- Very good stalks
- Widely adapted across many environments
- Excellent corn on corn hybrid

Versions: 51L73GTA

53W29 DGVT2PRIB 102-104 Day Maturity

- New DroughtGard® hybrid
- Consistent performance and excellent standability
- Best performance and medium-high populations
- Late flower, fast dry down

54A50 GENSSRIB 103-105 Day Maturity

- High yield potential
- Good western adaptability
- Improved Goss' Wilt tolerance

56Z50 GENSSRIB 105-107 Day Maturity

NEW!

- Responds to high management for top-end yields
- Very good test weight
- Good east to west movement
- Very good Goss' Wilt tolerance

SmartStax[®]
RIB COMPLETE

57F19 3111 107-109 Day Maturity

- Consistent yield performance
- Excellent root strength
- Excellent late season standability
- Very good Goss' Wilt tolerance

Agrisure **LIBERTY**
Viptera **LINK** 
3111

* Based on two years field observations by Select Seeds.

Versions: 57F15GT, 57F173110

57H55 GENSSRIB 106-108 Day Maturity

- Excellent roots and very good stalks
- Position on average to better soils
- Very consistent ear within row
- Good Goss' Wilt rating

SmartStax[®]
RIB COMPLETE

* Based on four years field observations by Select Seeds.

Versions: 57H25VT2PRIB

60K53 GENSSRIB 109-111 Day Maturity

NEW!

- Very strong yield potential
- Very good ability to move north to south for RM
- Wide adaptability for planting populations with good ear flex
- Very good yield response to irrigation

SmartStax[®]
RIB COMPLETE

Versions: 60K23VT2PRIB

61M35 3000GT

110-112 Day Maturity

- Consistent high yield performance
- Good movement north and south for maturity
- Produces deep kernels on semi-flex ears
- Very good late season standability

* Based on four years field observations by Select Seeds.

Versions: 61M33GTCBLL, 61M37GT

62F86 3110

111-113 Day Maturity

- High yielding hybrid
- High management hybrid, fungicide use recommended
- Eye-popping ears with high kernel rows and excellent kernel depth
- Optimum performance with timely harvest

* Based on four years field observations by Select Seeds.

62M55 GENSSRIB

111-113 Day Maturity

NEW!

- Very strong yield potential over a wide geography
- Consistent performance over a wide range of soil types
- Good southern movement for maturity
- Very good early vigor with great drought tolerance

* Based on four years field observations by Select Seeds.

62N36 VT3PRIB

111-113 Day Maturity

- Widely adapted across many environments
- Very high yield potential
- Very good test weight
- Excellent Goss' Wilt tolerance

* Based on four years field observations by Select Seeds.

Versions: 62N35VT2PRIB, 62N31RR2, 62C30

63R22 VT2PRIB 112-114 Day Maturity

- Widely adapted east to west with good southern movement
- Medium stature, impressive ear length and flex
- Produces deep kernels, good husk coverage
- Exceptional disease package including Goss' Wilt and GLS tolerance

64A34 VT3PRIB 113-115 Day Maturity

- Excellent yield potential in a very attractive package
- Very good test weight
- Excellent stalk rating
- Excellent seedling vigor

64D25 DGVT2PRIB 113-115 Day Maturity

- DroughtGard® Hybrid
- Does not need high plant populations to yield
- Excellent greensnap tolerance and very good Goss' Wilt tolerance
- Tall, high eared hybrid

64M57 GENSSRIB 113-115 Day Maturity

- Very good drought tolerance
- Consistent ear size with very good test weight
- Good southern movement
- Dual-purpose potential

Versions: 64M04, 64M27VT2PRIB

SOYBEAN BRANDS

The truth is, there's no "average acre."
So why choose an average bean variety?

Soybean

RR2X		Roundup Ready 2 Xtend® Soybeans
RR2Y		Genuity® Roundup Ready 2 Yield® Soybeans

2816NRX RR2X

2.8 Relative Maturity

- Excellent standability
- Very good emergence and stress tolerance
- Moderate resistance to BSR

2825NR RR2Y

2.8 Relative Maturity

- Consistent high yield performance
- Very attractive light tawny plant
- Very good disease package

3014NR RR2Y

- Great IDC score
- Sharp looking light tawny soybean
- Compact bush

3.0 Relative Maturity

3026NRX RR2X

- Excellent upright intermediate branching plant type
- Very good SDS, SWM and PRR tolerance
- Phytophthora and Cyst Nematode resistant
- Very reliable defensive soybean

3.1 Relative Maturity

* Based on two years field observations by Select Seeds.

3116NR RR2Y

- Excellent emergence
- Solid disease package
- Performs well east to west

3.1 Relative Maturity

* Based on two years field observations by Select Seeds.

3121NR RR2Y

- Great height and stress tolerance
- Excellent standability
- "Blonde" at harvest; attractive light tawny/tan

3.1 Relative Maturity

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

As of this printing no dicamba herbicide product has been approved for commercial in-crop use with Roundup Ready 2 Xtend® soybeans. DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO Roundup Ready 2 Xtend® Soybeans in 2016 unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application. While no in-crop use of dicamba is currently approved, some dicamba products may be labeled for weed control prior to planting a crop and subject to minimum plant back restrictions. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON Roundup Ready 2 Xtend® Soybeans, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® Soybeans and follow all pesticide product labeling.

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product.

B.t. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

IMPORTANT IRM INFORMATION: Genuity® RIB Complete® corn blend products do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Always read and follow IRM requirements.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready 2 Xtend Soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your Monsanto dealer or refer to Monsanto's Technology Use Guide for recommended Roundup Ready® Xtend Crop System weed control programs.

DroughtGard®, Genuity Design®, Genuity®, RIB Complete and Design®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, Roundup®, SmartStax and Design®, SmartStax®, VT Double PRO® and VT Triple PRO® are trademarks of Monsanto Technology LLC. LibertyLink and the Water Droplet Design® is a registered trademark of Bayer. Herculex® is a registered trademark of Dow AgroSciences LLC. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. All other trademarks are the property of their respective owners.

Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

SOYBEAN PIRACY STATEMENT: Seeds containing the Genuity® Roundup Ready 2 Yield® or the Roundup Ready 2 Xtend® traits can only be used to plant a single commercial crop. It is unlawful to save and replant Genuity® Roundup Ready 2 Yield® or Roundup Ready 2 Xtend® soybeans. Additional information and limitations on the use of these products are provided in the Monsanto Technology Stewardship Agreement, the Monsanto Technology Use Guide, and 2016 Technology Use Guide Addendum to include Roundup Ready 2 Xtend® Soybeans. U.S. patents for Monsanto technologies can be found at the following webpage: <http://www.monsantotechnology.com>.

BENEFITS OF NEW SEED: High Value of New Branded Seed

Latest Technology

- Highest yielding soybean technology available
- Six soybean trait products anticipated to come from Monsanto in the next 2-7 years*
- Leading seed treatment options

Customer Service

- Dealer agronomic support before and after the sale
- Replant policy support
- Convenient packaging and delivery

Reliable Germination and Quality

- Rigorously tested for quality and meets US Federal Seed Act requirements
- Free of seed-borne diseases
- Properly stored and conditioned

*Pending regulatory approvals.

Caution: Do not spray E-Z Refuge® products with Liberty® Brand Herbicide. Respect the Rotation™ is an initiative to elevate the importance and grower adoption of herbicide diversity to prevent or manage weed resistance. Glyphosate weed resistance is a dominating threat throughout the United States that affects land values, rental agreements, conservation tillage and can greatly reduce yields. The use of Integrated Weed Management practices, such as use of residuals, preemergence herbicides and rotation of crops, traits and herbicides, is critical as no one method is likely to be completely successful.
